PROFESSIONAL EXPERIENCE

Full Stack Developer/ Data Engineer Jul 2023 - Present
Ontario Dig Authority

- Built an end-to-end complaint tracking solution by engineering a backend pipeline using Microsoft Graph API for Outlook data ingestion and automating data flow into a Fabric Lakehouse. Partnered with frontend designers to define requirements and enhanced the form UI in Figma, ensuring compliance with company policies and improving user experience.
- Designed a Power BI live chat dashboard with an end-to-end data pipeline, enabling real-time insights into performance, service levels, and monthly trends through automated data ingestion and transformation from the Genesys API.
- Developed a Python-based data pipeline to automate a critical operations report, cutting processing time from days to minutes (90%+ reduction), and built a modern Power BI dashboard for multi-year analytics.
- Created a Python program and dashboard to surface lead insights for the DL program, leveraging recursive algorithms to traverse and connect complex ticket chains, improving visibility into related activities.
- Migrated 48+ legacy on-prem DB tables to Fabric Data Lake, modernizing infrastructure for scalable, distributed analytics and preparing data pipelines for LLM-powered insights and HPC workloads.
- Mentored junior developers on monthly reporting procedures, modern coding frameworks, OOP principles, and AI coding assistants (e.g., Copilot), improving debugging practices, multi-threaded processing, and overall code quality.

Software Developer - Full Stack Jan 2022 - Jun 2023
Freelancer

- Designed and deployed a full stack responsive web app with a React frontend, creating a modern, mobile-friendly online presence with React Native, for a local business's brand launch.
- Designed high-fidelity mockups and interactive prototypes in Figma, and front-end development including full page layouts and modular components, to streamline the design-to-development handoff and enhance user experience.
- Designed brand-specific visuals in Photoshop and edited videos in DaVinci Resolve to enhance digital marketing, SEO, and student enrollment.

Software Development Co-op Sep 2018 - Aug 2019
BlueCat Networks

- Designed a UI feature for an enterprise DNS SaaS product to handle deployment and validation events, in collaboration with the UI/UX team—enhancing operational transparency and reducing deployment-related inquiries by 30%
- Built a Java-based system test framework to optimize PostgreSQL configurations across customer databases, improving performance of 8 API calls by 13%
- Integrated J2EE-based backend services with Dockerized environments to automate and standardize testing processes for the client portal, cutting testing time by 20%+ and accelerating release cycles.
- Debugged and refactored key frontend modules using JavaScript and Python, enhancing performance and ensuring scalable, maintainable code for future development.

FEATURED PROJECTS

FraudShield – AI-Powered Fraud Detection System

- Built a fraud detection engine using LLMs and anomaly detection to flag suspicious transactions. Processed data with Python pipelines, embeddings, and GPT models for text analysis. Deployed via FastAPI for real-time checks and automated alerts.

InsightGen - Automated Report Generator

- Developed an AI tool to convert raw datasets into summaries and visualizations. Used LLMs for natural language insights on KPIs, exceptions, and trends. Automated pipelines with Python and FastAPI, with a React dashboard for exploration.

TECHNICAL SKILLS

Languages & Frameworks: Python, Flask, Django, Java, JavaScript (ES6+), TypeScript, Node.js, React
Web Development & APIs: HTML5, CSS3, Tailwind CSS, Chakra UI, Bootstrap, Webpack, Babel, RESTful APIs, GraphQL
Databases, Cloud & DevOps: Fabric, Azure, PostgreSQL, MySQL, Kubernetes, AWS
AI & Data: OpenAI APIs, Copilot, Pandas, NumPy, Scikit-learn, Data Pipelines, Power BI, Power Automate
Tools & Collaboration: Git, JIRA, VS Code

EDUCATION

University of Toronto Sep 2016 - Nov 2021
Bachelor of Science, Major in Computer Science and Mathematics
